Mission Statement

To provide field environmental services which emphasize Integrity, creativity, and professionalism to care for the environment while consistently exceeding our customer's project expectations.

CRG Texas

Casler Remediation Group, LLC
Environmental Services

Service Disciplines

CRG Texas is comprised of multi disciplinary team of mature, professional, and experienced individuals possessing a wide range of expertise associated with environmental projects.

Our experience include, but is not limited to:

- Phase I and II ESAs,
- Soil and ground water investigations, assessments, and remediation
- Regulatory agency correspondence, cost proposals, and reporting
- Environmental remediation project, and construction project management
- Underground and Aboveground Storage Tank compliance
- Environmental and Construction Consulting

CRG Texas has participated in federally funded projects for the Military (EPA, Army, Air Force, Navy, and National Guard) projects throughout the south and southwestern United States. Federal projects include soil and groundwater assessment and remediation, petroleum storage tank design and construction support services, environmental due diligence, and environmental compliance.

Private projects include Residential and Commercial development sites, Financial Institution due diligence projects, Quick Response sampling projects, Dry Cleaners, and Farm and Ranch properties.

Municipal projects include City of San Antonio, City of Houston, City of La Porte, and City of Pasadena, Texas Public Works and Engineering and Environmental Department projects, Airport fuel systems and bulk fuel storage facility assessments and remediation.

CRG Texas' reputation is built upon our core values of honesty, integrity, professionalism, and fast-friendly service.

Company Overview

CRG Texas

Casler Remediation Group, LLC
Environmental Services

CRG Texas, LLC was founded in 2006 by Nubia and Kevin Casler after seeing a need for an environmental service company that provides quality assessment and field services at a reasonable price.

CRG Texas knows how hard it is to find a quality environmental service provider who can deliver reliable services and quality data on time and within budget. The core principles of the company were founded not only to address private and industrial clientele, but also to Federal, State, and Municipal customers needs as well. CRG can supplement your team with experience, integrity, dependable, and quality services.

Over 23 years of experience working in telecommunications and engineering consulting has allowed CRG Texas to understand and deliver what environmental consultants and their customers projects require. Careful and proper planning and preparation is implemented into every project CRG performs in an effort to maintain a “get it right the first time” philosophy. Our customers depend upon us and may engage or services at any level, from design development and planning to full scale implementation stages.

CRG promotes this education through elementary, middle, and high school presentations about the water cycle and how we can make a difference in protecting our natural resources. Conservation is also a key factor that we touch on during these presentations. CRG Texas participates in hands on workshops and visual illustrations with elementary, middle, and high school children to promote the math and science professions that our future scientists and engineers will use in their communities to preserve this world we live in.

Key Personnel

CRG Texas

Casler Remediation Group, LLC
Environmental Services

Nubia Casler
President and Owner, CRG Texas L.L.C
Work Experience History:

Ms. Casler's work experience spans over 23 years of telecommunications consulting for government and corporate accounts. Ms. Casler gained her practical construction and design build experience while employed for 15 years by a national telecommunications company in Bogota, Colombia. Her responsibilities include: marketing and sales, intelligent building design, project management, customer service, and quality control . Her experience in new construction, existing renovations, and build-outs includes Private, Federal, and Municipal construction projects. Ms. Casler has over 7 years of financial consulting and environmental consulting experience. Ms. Casler controls the marketing, company management, and implementation phases for the company.

Her relevant work expertise includes: business and marketing plan development, project personnel management and skill development, financial planning and control of all cash flow, subcontractor relations, diversity, human resources, and quality control. Ms. Casler is key to the day to day operations and success for CRG Texas that comes from careful planning, implementation and completion, as well as detailed attention to customer service.

Ms. Casler holds a bachelor's degree in Marketing from Escuela Colombiana de Mercadotecnia in Medellin, Colombia. Ms. Casler has been in the United States over 10 years working in real estate and financial consulting, and environmental consulting areas. Ms. Casler is an active member of the National Association of Minority Contractors (NAMC), the National Hispanic Professionals Organization (NHPO), the National Association of Credit service Organizations, and the Women in Business EMPRETEC program sponsored internationally. EMPRETEC is an integrated capacity-building programme of the United Nations Conference on Trade and Development (UNCTAD) in the area of SMEs and entrepreneurial skills promotion. It is dedicated to helping promising entrepreneurs put their ideas into action and fledgling businesses to grow. Ms. Casler is bi-lingual in English and Spanish and is taking on-line English courses through Servicio Nacional de Aprendizaje (SENA- the National Service of Learning in Colombia), and provides charity support for the Friends of North Richmond organized by RiverPointe Community Church.

Key Personnel

CRG Texas

Casler Remediation Group, LLC
Environmental Services

Kevin C. Casler
Vice President and Owner, CRG Texas L.L.C
Work Experience History:

Mr. Casler's work experience spans over 20 years of engineering construction materials testing, consulting, and inspections, and environmental engineering consulting, field investigation, assessment, and remediation practices. Mr. Casler gained his practical construction materials and geotechnical experience while employed for 6 years by a national engineering testing laboratory, Professional Service Industries (PSI) from 1985 until 1991. His construction and geotechnical work experience includes soils laboratory analysis and geotechnical engineering testing, field construction materials testing and field inspections for Private, Federal, and Municipal construction projects.

Mr. Casler has over 19 years of soil and groundwater assessment, investigation, and remediation experience. Mr. Casler holds and maintains his Texas Commission on Environmental Quality (TCEQ) A and B License for UST Installation and Removal project management as a "Licensed On-site Supervisor", is a registered TCEQ Corrective Action Project Manager (CAPM), and participates actively in workshops and presentations for public and private schools, private industry, and the regulatory community. CRG Texas, LLC is a TCEQ registered Corrective Action Specialist (RCAS).

His full time relevant work expertise includes Phase I & II Environmental Site Assessments (ESAs), soil and groundwater assessments, pilot scale-design development-full scale soil and groundwater remediation, and point source identification. CRG Texas' environmental field sampling services provided specialize in soil, surface water, and ground water for assessment/investigation, and corrective action at petroleum, chlorinated solvent, and hazardous waste sites.

Mr. Casler's responsibilities include: project management, personnel training and oversight, customer relations, and sales and marketing for CRG Texas. Mr. Casler is registered with the Texas Commission on Environmental Quality (TCEQ) Corrective Action Project Manager (CAPM) and Licensed On-site Supervisor for petroleum storage tank construction and environmental corrective action sites.

Project Experience

Casler Remediation Group, LLC
Environmental Services

Phase I and Phase II Environmental Site Assessments, Soil/Groundwater Investigations and Remediation, at over 160 Convenience Store And Commercial Gasoline

Retail Petroleum Storage Tank (PST) Properties

- Phase I and Phase II Environmental Site Assessments (ESAs),
- Owner and Buyer Interviews
- Environmental Due Diligence
- Personnel and Subcontractor Coordination
- Work Plan and Cost Proposal Preparation
- Soil Boring and Monitoring Well Installations
- Product recovery , Soil and Ground Water Remediation
- Reporting

Phase I and Phase II Environmental Site Assessments, Soil and Groundwater Investigations and Remediation, at over 200 City of Houston Land Assemblage Redevelopment Authority (LARA) Properties

- Phase I and Phase II Environmental Site Assessments (ESAs),
- Interviews with Operators, Owners, and Buyers
- Environmental Due Diligence reporting

Professional Assessor for Over 60 Various Properties Nationwide: Vacant Land, Apartments, Motels/Hotels, Bank Buildings, Chemical Facilities

Phase I and Phase II Environmental Site Assessments (ESAs),

- Interviews with Operators, Owners, and Buyers
- Environmental Due Diligence reporting

Petroleum Storage Tank Compliance Inspection and Reporting, West Texas Airfield, Texas

Field Investigation services to determine potential real estate financial liabilities

- UST/AST compliance inspections and reporting
- Phase I ESA Due Diligence
- Phase II ESA soil and groundwater sampling and reporting

Project Experience

CRG Texas

Casler Remediation Group, LLC
Environmental Services

Capital Funds Underground Storage

Tank Investigation and Remediation, Multiple Departments, City of Houston, Texas

- UST/AST System Design Support
- Preparation of Plans and Specifications
- Health and Safety Plan Preparation and Monitoring
- Compliance Inspections
- Construction Oversight and Project Management
- Soil and Groundwater Sampling,
- Aquifer Testing
- Regulatory Agency Reporting

Phase II ESA and Reporting,

City of Houston Public Works Design Development Project, Houston, Texas

- Field Investigation services to determine real estate financial liabilities
- UST/AST compliance inspections and reporting
- Phase I ESA Due Diligence
- Phase II ESA soil and groundwater sampling and reporting

Phase II ESA Field Support,

City of Lake Charles, LA EPA Brownfield Restoration Project, Lake Charles, Louisiana

- Field Investigation services to determine soil and groundwater quality
- Soil boring installations,
- Soil and Groundwater Sampling
- QA/QC Documentation and Sampling
- Subcontractor Coordination and Oversight

Phase I and II ESAs and Reporting

Various Sites in Dallas, Texas

- Phase I ESA Due Diligence and Reporting
- Field Investigation services to determine soil and groundwater quality
- Soil boring installations,
- Soil and Groundwater Sampling
- QA/QC Documentation and Sampling

Project Experience

CRG Texas

Casler Remediation Group, LLC
Environmental Services

UST Design and Site Remediation, Fort Bliss in El Paso, Texas

- Groundwater monitoring
- Soil and Ground Water Assessments and Leak Investigations
- Remediation System Design
- Underground Storage Tank System Design
- UST/AST system Construction Oversight
- Mobile Dual Phase Extraction (MDPE) Pilot Testing and Full Scale Remediation Oversight

Soil and GW Chlorinated Solvent Remediation, Houston TX, BPI Realty Services, Inc. Houston, Texas

- On-Site and Off-Site Soil and Groundwater Investigations and Delineation
- Soil Boring and Ground Water Monitoring Well Installations,
- Low Flow Groundwater Monitoring
- Sewer Line Video Inspection and Hydrostatic Testing,
- In-Situ Chemical Oxidant Injections and Pilot Testing
- Off-site Adjacent Property Assessments

Chlorinated Solvent Investigation and Remediation, Channelview TX, Rescar Railcar Services, Channelview, Texas

- Excavation and Confirmation Sampling
- Waste Characterization and Disposal
- Soil Boring and Well Installations
- Low Flow Groundwater Monitoring
- Plume Delineation
- Aquifer Pump Testing
- Potassium Permanganate Feed System Design, Construction Oversight, and O&M
- Subcontractor Coordination and Oversight
- Regulatory Agency Reporting

Project Experience

CRG Texas

Casler Remediation Group, LLC
Environmental Services

Underground Storage Tank Assessment, Removals, and Remediation Projects, TXDOT, Houston and Surrounding Areas, TX

- UST Locate and Removals
- Release Determination and Corrective Action Reporting
- Soil Boring and Monitoring Well Installations
- Groundwater Monitoring

Soil and Ground Water Assessment, Soil Excavation, Disposal, and Backfilling Project Vanover Enterprises, Bryan, Texas Facility

- Soil and Groundwater Assessment
- TRRP Tier 1 Analytical Comparison of Results
- Soils Excavation, Stockpiling, Waste Profiling, and Disposal
- Backfilling
- Miscellaneous Drum Fluids Disposal

Bulk Terminal Facility Soil and Groundwater Investigations and Remediation Tank Investigation and Remediation, GATX Terminals, Galena Park, Texas

- UST/AST System Design Support
- Preparation of Plans and Specifications
- Compliance Inspections
- Soil and Groundwater Sampling,
- Aquifer Testing
- Regulatory Agency Reporting

GW Delineation and Remediation Project, NASA- Johnson Space Center, Houston TX

- Work Plan, Cost Proposal, and Report Preparation
- Permit Facilitator, Contractor Coordination and Oversight
- Soil Boring and Monitoring Well Installations
- Low Flow Groundwater Monitoring
- Chemical Oxidant Field Pilot Testing, Full Scale Chemical Oxidant Injections
