

ENVIRONMENTAL SCIENTIST

Company Description

CRG Texas Environmental Services, Inc. is a comprehensive environmental Consulting firm specializing in environmental due diligence, risk management, regulatory compliance, field assessments, remediation, waste management and LPST services. CRG Texas tackles diverse environmental challenges while staying updated on federal, state, and local regulations. CRG Texas strives to provide tailored solutions to meet clients' project-specific needs through a combination of expertise and innovative practices.

Role Description

We are seeking a motivated **Environmental Scientist** with 3-4 years of experience performing **Phase I and Phase II Environmental Site Assessments (ESAs)** in accordance with ASTM standards and Texas regulatory requirements, it is a plus if you have experience of SWPPP. This position is ideal for someone who is detail oriented, enjoys fieldwork, and wants to grow within the environmental due diligence and remediation space.

Key Responsibilities

Phase I ESA Duties

- Conduct site inspections and property reconnaissance.
- Review historical sources (aerials, city directories, topographic maps, etc.).
- Review regulatory databases for environmental records.
- Interview site contacts, property owners, and relevant agencies.
- Identify Recognized Environmental Conditions (RECs) and prepare clear, defensible findings.
- Prepare complete Phase I ESA reports following ASTM E1527.

Phase II ESA Duties

- Assist in planning and executing soil, groundwater, and vapor sampling events.
- Oversee drilling operations, direct-push sampling, and monitoring well installation.
- Collect soil, groundwater, and soil vapor samples in accordance with industry standards.

- Perform field screening and document field notes, chain-of-custody, and sample logs.
- Coordinate with certified laboratories for sample analysis.
-

- Contribute to Phase II ESA reporting, including data interpretation and summary tables.

SWPPP Duties

- Executing environmental compliance tasks, including the development of Stormwater Pollution Prevention Plans (SWPPP) .
- Field work at various industrial facilities in Texas.
- Write plans, clients training, reports and coordinating with clients and other professionals.

Preferred Skills:

- Experience with GPS/GIS data collection.
- TRRP (Texas Risk Reduction Program) familiarity.
- Experience with groundwater sampling techniques (low flow, bailers, etc.).
- OSHA 40-hour HAZWOPER certification (or willingness to obtain).

What We Offer:

- Competitive salary based on experience.
- Paid training and opportunities for professional development.
- Supportive team environment with room to advance.
- We offer competitive salaries, most major holidays and personal time off.
- Medical, dental, vision and life insurance and match retirement plan
